

THE GAMBIA

Project No: 2017-GMBTRANS-468

Project Title: Analysis of the Road Database Management Systems in the Selected OIC Countries

Project Owner: Ministry of Transport, Works and Infrastructure of the Gambia

Partner Countries: Senegal, Nigeria

Cooperation Area: Transport and Communications

Implementation Year: 2018

Project Purpose: The 32nd COMCEC Ministerial Session recommended member countries to establish road database management systems to ensure more effective preventive maintenance and to improve flow of traffic. In line with this policy recommendation, the project focused on preparations for establishment of a road transport database management system in the Gambia by utilizing the experiences and best practices in the partner countries.

Project Activities:

- Workshop for producing a road map to establish a road database management system
